

ALBERT EINSTEIN
NOBEL PRIZE WINNER

"We may well be grateful to Harrison Brown for this book in the condition of mankind as it appears to an erudite, clear-sighted, critically appraising scientist. . . . The latest phase of technical-scientific progress, with its fantastic increase of population, has created a situation fraught with problems of hitherto unknown dimensions. . . . This objective book has high value."

WILLIAM O. DOUGLAS
U. S. SUPREME COURT

"*The Challenge of Man's Future* cuts through today's worries to the great risks that face civilization beyond the threats of Soviet imperialism. The book puts together problems facing the entire world community, arising from population, food, raw materials, and industrialization—themes on which the best minds of all continents must soon be united. It makes startlingly clear how American liberty and Asian hunger are linked irrevocably. It challenges all men to find horizons far beyond the sights which the daily press sets for us."

MARSTON BATES, *New York Times*
". . . a really extraordinary achievement, a masterly synthesis of all of the diverse fields of scientific knowledge that bear on the problems of relations between population and resources."

The Viking Press • 625 Madison Avenue • New York 10022

"If we choose
to remain ignorant
of the facts in
this great book,
we choose
a fool's paradise."

—H. J. Muller,

Nobel Prize Winner.
