- UK anti-terrorism legislation gives the police access to information on any citizen held by public bodies. Citizens can now face house arrest without trial on the order of the Government.
- All European Union officials including police are exempt from prosecution for acts committed in their official capacity.
- An EU Directive on data retention will require communications companies to keep fax, phone, and internet usage data for 3 years. Police and government agencies will have access to this information without judicial oversight.
- The US Government is building a 'Total Information Awareness' network that will combine all public and private sector data into a huge Big Brother surveillance database.
- The US military is shipping terror suspects to foreign countries to be tortured. Ordinary crime and even protesting is being redefined as terrorism worldwide
- Under the proposed EU 'Corpus Juris' legal system, trial by jury will be abolished. Citizens are presumed guilty until proven innocent and can be held for up to 9 months in prison without charge.
- The UK Government has announced plans for satellite tracking and taxation of all motor vehicles.
- The Mexican Government has implanted its judicial workers with microchips for security clearance. The use of implanted microchips is being marketed as a new method of payment to replace cash and credit cards. Satellite tracked implanted microchips are being developed.
- The US Government has announced plans to screen all school children for mental illness and suitability for psychiatric drugging. The UK Government is extending compulsory psychiatric drugging to anyone deemed to have mental health problems.
- Thousands of toxic chemicals and certain foods – soy in particular - are altering the gender characteristics of infants. Between 1 in 200 and 1 in 1000 children are born with a visible or concealed ambiguity in their genitals, gonads and/or chromosomes which qualify them as intersex.
- Internationally integrated biometric ID cards, visas, and passports will allow governments to track citizens across the globe.
- Surveillance cameras that can digitally identify people by their faces have been developed.
- Radio frequency tracker chips the size of a grain of sand have already been introduced into products across the UK and US. Eventually these chips will track every consumer purchase. The European Central Bank plans to put them into Euro bank notes to end the anonymity of cash.
- GM crops that contain pharmaceuticals are being trialled, creating the prospect of universal drugging through the food supply.
